

1. ECONOMIC OVERVIEW

King of Games and DEX is a Blockchain technology company applying in 5 core areas include: Web 3.0 and Blockchain Wallets - Coinlaunch, DEX-CEX Exchange, DEFI Bank 2.0, Blockchain Games and Blockchain Social Network 3.0.

We create an on-chain ecosystem that uses KGD tokens as an intermediary and a governance token between applications, which has the same role as a type of bonus corresponding to each value of the shares of the business. The company is one of the first enterprises in the blockchain environment according to the principles of publicity, transparency, decentralization and reasonably decentralized interests. The company has a fully developed and sustainable ecosystem including web 3.0 and Blockchain Wallets - Coinlaunch, DEX-CEX Exchange, DEFI Bank 2.0, Blockchain Games and Blockchain Social Network 3.0.

WALLETS AND COINLAUNCH

Wallet has the same function as a cold wallet or hardware wallet because we always prioritize security with 4 layers: Password, email authentication, Google Authenticator and KYC authentication. Coinlaunch performs the role of launching tokens of brands and businesses wishing to raise capital on our system. Covers all types of fundraising including ICOs, IEOs and STOs. Users self-govern the coin/token on the blockchain and no one can interfere or use it from the outside.

DEX-CEX AND DEFI BANK 2.0

Dex acts as a token exchange tool through a decentralized swap-dex function, Cex is similar to a centralized exchange of tokens/coins that are considered as a bonus in the ecosystem. The second generation DEFI 2.0 (Decentralized Finance) function has many outstanding advantages over the first generation, with the same function as staking the project's token and receiving periodic corresponding dividends.

GAMEFI

Gamefi includes many different games belonging to main groups of Funny Games: 2D and 3D game group is a collection of fighting online games, the characteristic properties of this game are easy to play, easy to manipulate, entertaining nature high interaction between players. We have calculated the ratio between earning and spending tokens properly to ensure inflation within allowable limits, which we commit and disclose in quarterly and annual reports on the state of circulation, inflation in the ecosystem, thereby stabilizing and increasing the value of the business as well as the value of the transaction.

SOCIAL NETWORK 3.0

This application can be downloaded from the system's web and installed easily for Android, IOS and PC systems. Social network 3.0 is a social network consisting of users who already have a wallet in the system, sharing the system's wallet and sharing the system's login account. The functions of this network are functions that generate a separate NFT for each individual in the form of images, offline videos or onlive videos on Social Network 3.0.

b. Functions of tokens

KNB token is used as a bonus in the game for the purpose of exchanging items, upgrading equipment, costs for participating in events, rewards for games of the KGD ecosystem.

4. BENEFITS FOR THE COMMUNITY

For the community, using the same token throughout the ecosystem makes it much more convenient and flexible for users to change to another token when they want to use the service. The ecosystem consists of many practical applications linked together, including storage applications, trading applications, entertainment applications, and user connection applications so that users have more choices. With the Blockchain network, there is a decentralized database based on the confirmation of independent nodes, making information more secure.

For each user, using the ecosystem has many benefits including entertainment, communication, storage, transaction, shopping and widespread connectivity, while information is guaranteed to be safe. Secure, personalized, personal information is not tracked and is disclosed to the outside due to the characteristics of the Blockchain network. Building a fair and disciplined community according to the behavior of a miniature society. Besides, users can also experience modern technologies that are rapidly becoming a reality.

5. COMMITMENT TO FEMALE DEVELOPERS

We always look forward to collaborating with organizations, companies and individuals who wish to participate in the project as partners and/or investors. However, the cooperation agreements must comply with the principle such as not changing the roadmap or reducing the time to implement the company's development roadmap; does not change the KGD circulation route in the system as well as on exchanges and e-wallets; does not affect the honor and reputation of the company, does not affect the interests of previous investors including those who are holding KGD and consider it as an investment. For cooperation contact information, please go through our corporate support channels including support email and our web-based contact channels. The support team will contact and work as soon as possible.
